

Northern Gas Pipeline Project Update

Edition 3 November 2017

Jemena thanks Bushfires NT in Tennant Creek

Jemena recently took time out to meet with Bushfires NT in Tennant Creek. Northern Gas Pipeline Project Director Jonathan Spink thanked volunteer firefighters and staff for their efforts on the Project to date, which included preparing and burning off at both the pipe yard and the Phillip Creek Compressor Station site.

The work with Jemena also provided valuable training opportunities for volunteer firefighters, including for a number of new recruits.

In recognition of the local unit's work, Jemena has provided a financial and in-kind donation.

Jemena's Phil Noble has been a volunteer for many years while Sean Chipman has recently joined the unit.

NGP Project Director Jonathan Spink with Bushfires NT volunteer firefighters in Tennant Creek last week.

NGP Project milestone: 2017 pipe requirements completed ahead of schedule

This year, 21,814 lengths of pipe (403km) have been safely loaded, transported, and unloaded to Jemena's Northern Gas Pipeline Project, achieving a construction milestone.

In Queensland, 7,625 lengths of pipe were safely moved from the pipe yard near Tennant Creek, in the NT, to Spiecapag's right of way (ROW) between Camooweal and Mount Isa.

The pipe transportation used 153 double road trains.

Meanwhile in the NT, 14,189 lengths of pipe (262km) have been safely delivered to McConnell Dowell's ROW using 309 double road trains.

Transporting pipe is a major logistical effort for Jemena's contractors requiring a large team working together to load, transport

and unload the pipe, along the ROW ahead of welding.

Pipe is loaded and unloaded using the latest technology – a vacuum lift attached to an excavator. This allows pipes to be safely lifted from the stockpile to road trains and off again without cranes.

This year's pipe deliveries have been completed ahead of time.

Pipe transportation has ceased for the wet season break.

Load out and haulage for the remainder of McConnell Dowell's NT and QLD section of pipeline will resume early next year.

Jemena would like to thank each and every person involved for their efforts in the transportation and loading of our line pipe.

Questions?

If you have any questions about the project we are happy to meet with you to discuss them.
